Company Profile

Genesis Water Technologies, Inc. is a USA based manufacturer and supplier of advanced integrated solutions for drinking water, process water & waste water treatment, filtration, and purification.

GWT is dedicated to providing superior customer support, technical assistance and high quality products and system solutions to solve our clients water treatment needs across the world.

Mission & Core Values

Mission:

Our Mission is to be a global leader in specialized sustainable & innovative water treatment solutions for drinking water, industrial process water, and grey & waste water reuse.

Core Values:

- * Commitment to Our Clients - We support our customers' success
- * Integrity - We will strive for the highest standards of transparency in all aspects
- * Innovation - We will embrace change to learn and grow
- * Quality - Dedication to continuous improvement
- * People - We foster teamwork, collaboration, initiative and accountability.
- * Environmental Sustainability – Protecting environment and supporting local communities.

World Water Problems

Inadequate access to safe drinking water by over 1.15 billion people

Reduced groundwater supplies leading to diminished agricultural yields

Pollution and contamination by sewage, industrial and agricultural runoff into waterways

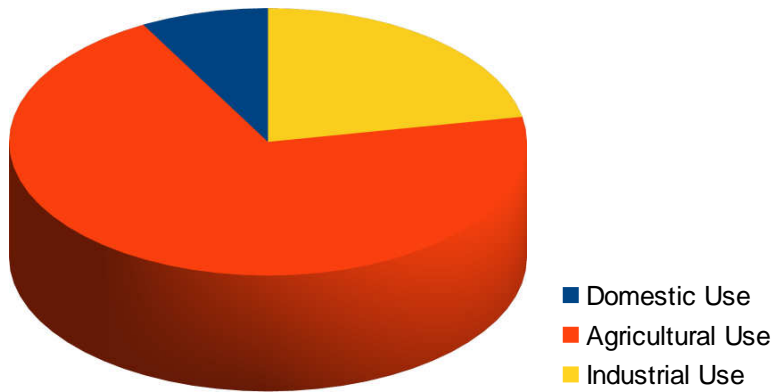

Depletion of aquifers caused by overuse as a result of population growth

Regional conflicts over scarce water resources resulting in altercations and potential warfare

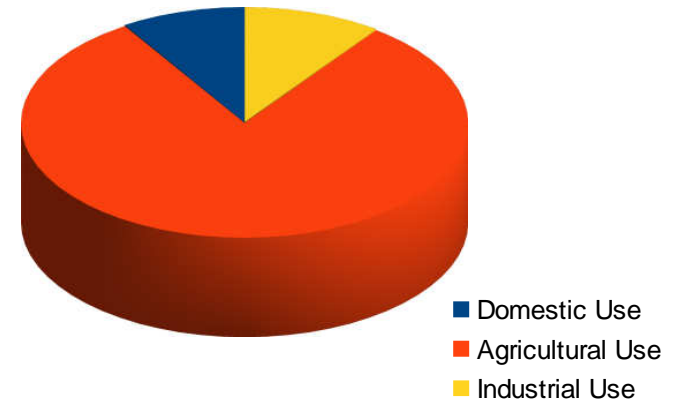

Competing Water Uses
